Model: Supply_Chain | Generated: 2026-05-01 18:55:04 UTC

Risk Assessment Summary

Risk Score: 40.25%

Risk Level: MEDIUM

Metric: Supply Chain Disruption Risk

Input Parameters

Global Congestion: 53.9

High Risk Ports: 17

Vessels Tracked: 12231

Global Risk Score: 37.7

Recommendations

- High port congestion. Add 3-5 days buffer to shipping schedules.
- ■ 17 major ports showing high congestion. Diversify shipping routes.
- High vessel traffic in major shipping lanes. Expect potential bottlenecks.
- Monitor: Shanghai, Singapore, Rotterdam showing highest congestion levels.
- Moderate supply chain pressure. Monitor shipments closely.
