

FORPY Corporate Report

Model: Supply_Chain | Generated: 2026-05-01 17:44:28 UTC

Risk Assessment Summary

Risk Score: 39.4%

Risk Level: MEDIUM

Metric: Supply Chain Disruption Risk

Input Parameters

Global Congestion: 52.4

High Risk Ports: 15

Vessels Tracked: 12061

Global Risk Score: 36.7

Recommendations

- High port congestion. Add 3-5 days buffer to shipping schedules.
- 15 major ports showing high congestion. Diversify shipping routes.
- High vessel traffic in major shipping lanes. Expect potential bottlenecks.
- Monitor: Shanghai, Singapore, Rotterdam showing highest congestion levels.
- Supply chain conditions normal. Proceed with standard shipping.
