

FORPY Intelligence

AI-Powered Institutional Financial Terminal

Investor deck for strategic funding, enterprise partnerships, and acquisition conversations

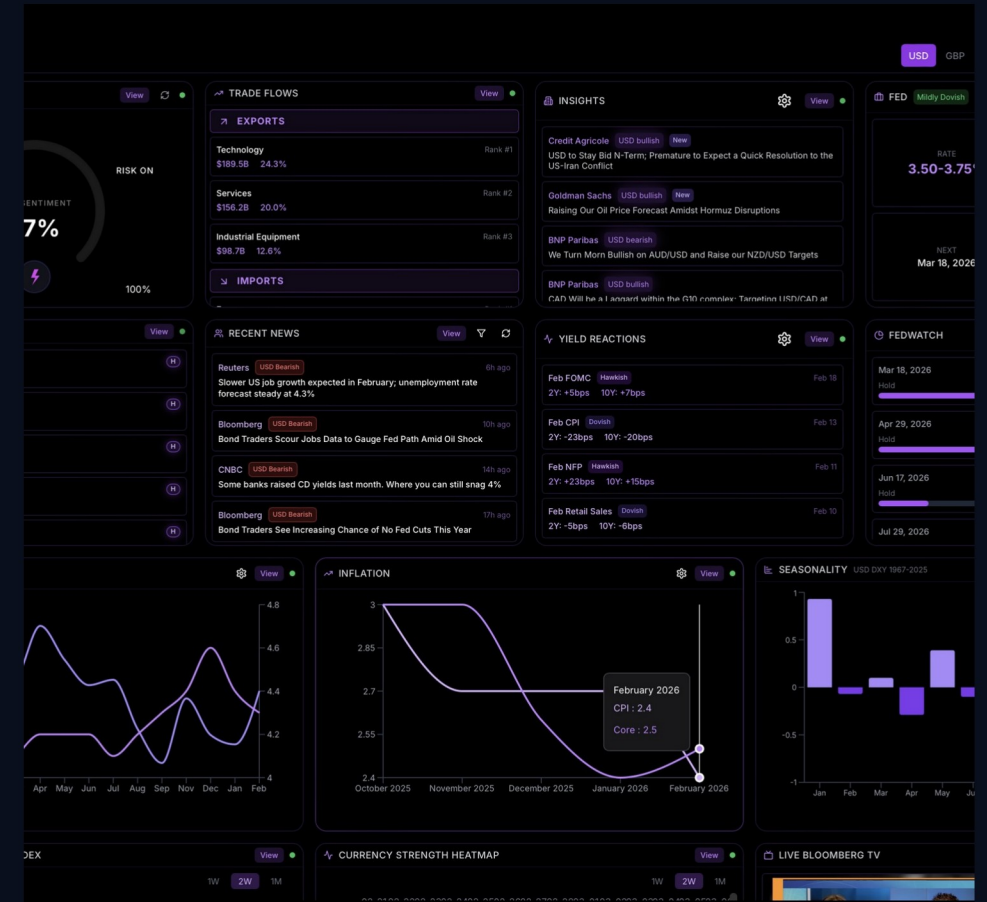

Institutional-grade analytics • 12+ ML models • F&O intelligence • deep-learning sentiment • autonomous AI agents • real-time risk context

Private demo
available

The problem

- Financial workflows are fragmented across charts, research, sentiment, derivatives, and risk tools.
- Legacy terminals are powerful but costly, static, and not designed around real-time AI reasoning.
- Most teams still translate raw market noise into insight manually under time pressure.
- Mid-market institutions, fintechs, family offices, and strategic buyers need a modern intelligence layer.

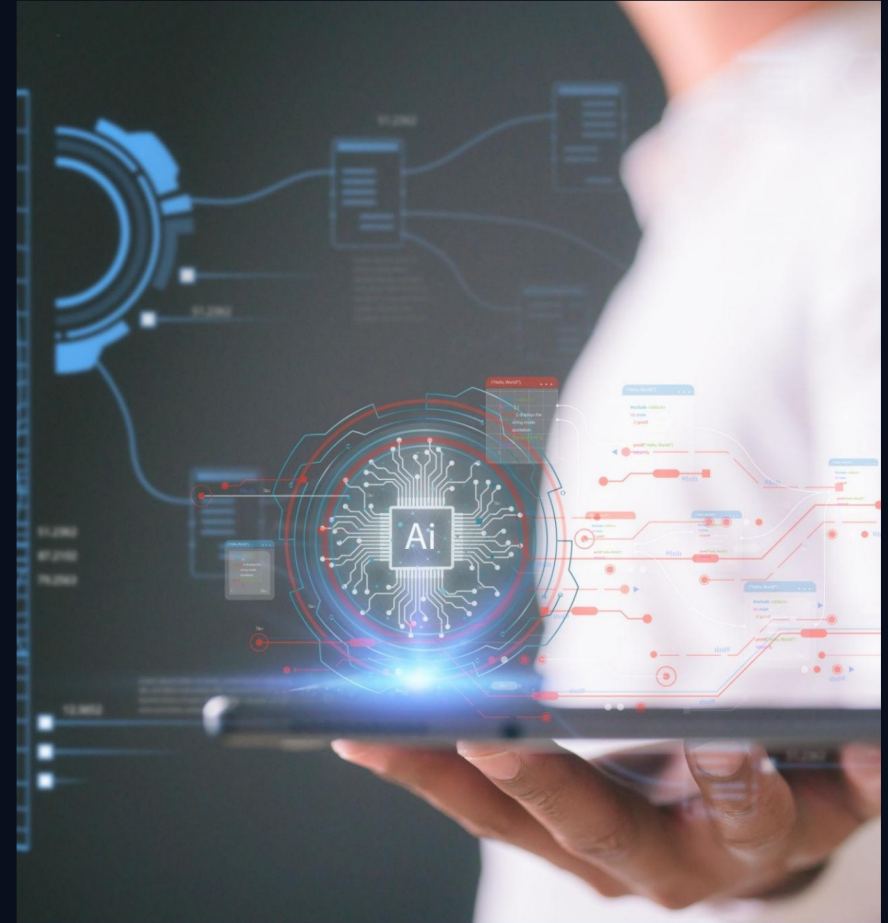

Markets create more data every day — but not more clarity.

The solution

FORPY unifies market analytics, predictive models, agentic reasoning, and risk interpretation inside one institutional product surface.

- Multi-asset terminal covering equities, indices, ETFs, crypto, commodities, and FX
- Predictive machine learning signals and explainable intelligence summaries
- F&O strategy framing, sentiment analysis, and real-time risk context
- Autonomous AI agents for synthesis, prioritization, and research support

Product modules

Meta AI

Agentic market interpretation

Predictor

ML-driven signal framing

Meta Hub

Cross-market synthesis

F&O Intelligence

Derivatives context

Sentiment Engine

Deep-learning sentiment

Risk Layer

Real-time risk intelligence

ML module in action

Signals, simulation, scenarios, and portfolio construction are unified into one institutional ML workflow.

● Signal engine

Directional bias, expected move, confidence, and model agreement for live signal framing.

● Return simulator

Buy-and-hold, SPY benchmark, ML timing, drawdown, volatility, and watchlist comparison.

● Apex forecaster

Single-stock and watchlist bull, base, and bear scenarios with projected alpha vs benchmark.

● Strategy builder

Corpus amount, horizon, risk profile, max weights, and action-oriented allocation guidance.

● Model stack

RF, LSTM, GRU, Transformer, XGBoost, LightGBM, CatBoost, CNN-LSTM, and ensemble workflows.

● Portfolio intelligence

Watchlists become concentration, overlap, hedge, trim-before-add, and rebalance intelligence.

Why FORPY can matter

AI-native workflow

Built around AI interpretation, not bolt-on AI features

Explainable intelligence

Moves from raw signals to context, prioritization, and action framing

Modular architecture

Expandable across terminal, API, white-label, and enterprise use cases

Strategic asset value

Relevant to investors, partners, and acquirers seeking capital-markets AI IP

Commercial model

Subscriptions

Premium terminal subscriptions for professionals and institutional users

Enterprise licensing

Private deployments, team workflows, and institutional pilots

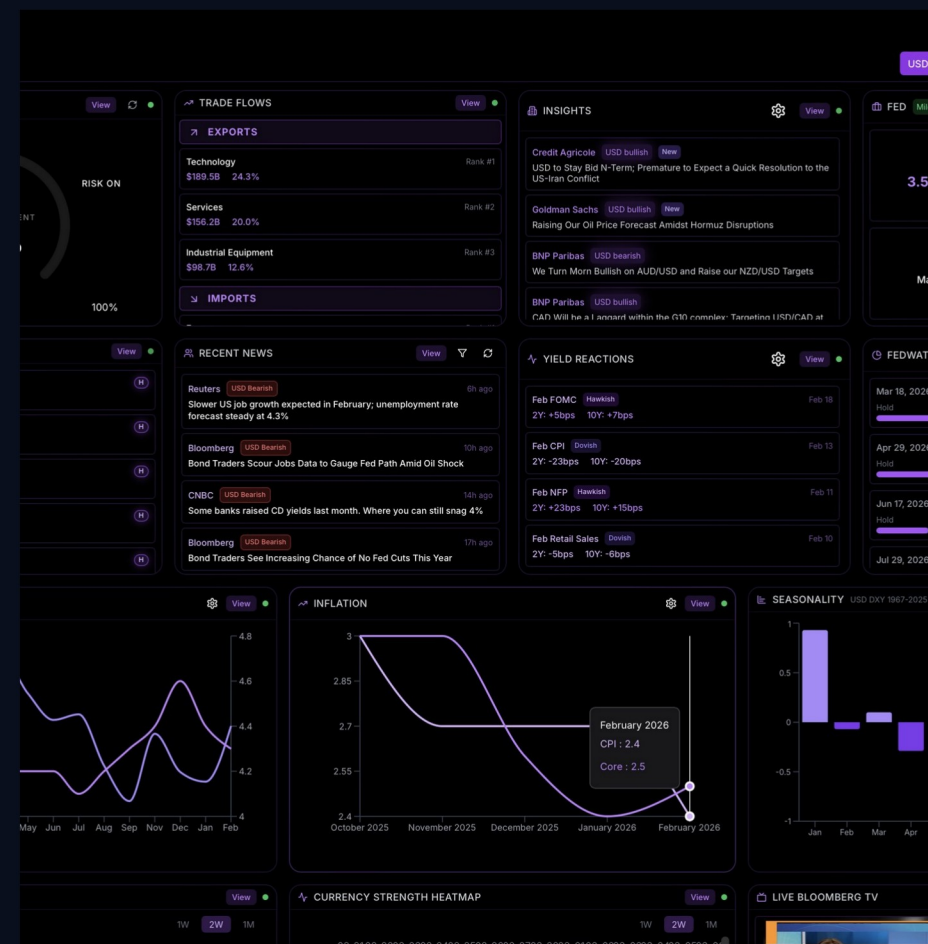

APIs and data products

Signal feeds, intelligence widgets, and white-label integrations

Designed to support venture-scale growth while remaining attractive for strategic M&A or distribution partnerships.

Execution and readiness

- Live platform experience already deployed across core pages and investor-facing routes
- 12+ machine learning models embedded across predictive and intelligence workflows
- Multi-asset market surface aligned to institutional-grade positioning
- Clear investor narrative for fundraising, licensing, and acquisition discussions

Strategic acquisition fit

FORPY can be valuable to several buyer categories:

Market-data and terminal platforms

Add AI-native intelligence and modern product depth

Brokers and trading workflows

Enhance client-facing analytics and signal generation

Fintech infrastructure providers

Accelerate applied AI capability in capital markets

Institutional research tools

Compress analyst workflows with explainable intelligence

Visibility and outreach plan

- Create and optimize profiles on Crunchbase and Wellfound
- Launch FORPY on Product Hunt with a demo-first positioning
- Open strategic-buyer visibility via Acquire.com
- Add company profile and investor discoverability on Dealroom
- Run founder-led LinkedIn and email outreach into U.S. and Silicon Valley fintech / AI investors

30-day sequence

- Week 1 — profiles + narrative
- Week 2 — deck + teaser demo
- Week 3 — launch + outreach
- Week 4 — follow-up + meetings

What we are asking for

FORPY is opening conversations across three paths:

- Strategic investment to accelerate product, distribution, and enterprise readiness
- Acquisition dialogue with buyers seeking differentiated capital-markets AI capability
- Institutional partnerships, white-label deployments, and pilot customers

Financial markets do not need more dashboards. They need a real-time intelligence layer.
